Sindh

Dear Colleague,

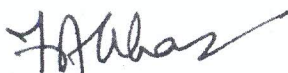

The department of Postgraduate Medical Education of Aga Khan University offers Residency and Fellowship Programmes in various disciplines besides one-year Internship programme. These programmes are structured to provide trainees with increasing responsibilities under the supervision of full-time faculty members. Trainees are evaluated and debriefed periodically about their progress and are encouraged to develop a life-long habit of self-directed learning.

The University is equipped with all the necessary resources required for postgraduate training that include Library, Learning Resource Centre with computers, Laboratory, Radiology and other services. The education process at AKU goes far beyond the traditional acquisition of medical knowledge and procedural skills and includes communication skills, biomedical ethics, teaching skills, research methodology and critical thinking. All Residency programmes and most of the Fellowship programmes are approved by the College of Physicians and Surgeons Pakistan (CPSP). The Internship programme is recognized by both Pakistan Medical and Dental Council and CPSP.

We have now started the induction process for our new academic year and are accepting applications for Internship, Residency and Fellowship Programmes. The first deadline for acceptance of applications is July 27, 2016 and the second deadline is Monday August 08, 2016. I would appreciate if you could arrange to display the attached information posters on the notice boards in order to disseminate this information to prospective applicants of your institution.
